WHY ARE WE HERE

When building takes hours, you can try a hundred ideas.

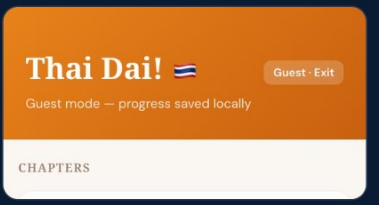

AI has made building so fast that the edge is now how many things you try. My own app Luotsi started as a weekend experiment and became Finland's biggest boating app.

Keep what works

Oskar Kallio · Velho

VELHO

We help companies grow as fast as possible.

A strategic AI growth partner. We free up time for growth by finding the manual work that slows a company down, building the fix and makeing sure people actually use it.

01

Find

Possible bottlenecks or growth opportunities hiding in plain sight

02

Prioritise

By business value, effort and how fast the customer will benefit

03

Ship

The smallest useful build, into real work fast

04

Adopt

Until the team actually uses it every day

THE CHALLENGE

Build us a tool that gets meetings.

An internal B2B marketing tool that gets Velho in front of the right companies, and books the meeting.

Anything goes

Any data, any medium, any channel. We value innovative solutions.

Real, not slideware

It has to work live, on a company the judges pick.

Would a CEO reply?

That's the bar. The output has to make a real buyer respond.

SOME DIRECTIONS, NOT A MENU

Surprise us.

Proof before pitch

A working demo on the prospect's own data, before the first meeting.

Signals in public data

Permits, register changes, tenders and job ads that say "now".

Trade fair companion

Snap a booth, get a brief and a follow-up before you walk away.

Buyer simulator

Practise your pitch on an AI CFO built from a real annual report.

Dead deal resurrector

Finds conversations that went quiet, and a reason to reconnect.

One-of-one media

A video or a postcard made for exactly one company.
